

# Grading Standards for Team Projects

items		Points
Program	Opcode+EA	50
	I/O	20
Final documentation		10
Final project peer evaluation		10
Project team		2
Confidential Individual Evaluation		2
Progress reports		6
<b>Total</b>		<b>100</b>

In most cases, a team will share the same grade, but there will be exceptions if necessary.

Each team member's project point is first given based on final product. Then, based on the confidential evaluation report, members whose contribution are too low, will have additional point reduction.

The program will be carefully tested for all required op-code and EAs.

I/O: 20 points, till 0

- Program does not have options to restart or finish: -4 points
- Program does not print the address of each instruction: -4 points
- Program does not handle improper user inputs: -4 points
- Program does not print results as one screen at a time: -4 points

Opcode: 25 points, till 0

- For each incorrectly disassembled Opcode
  - Causing program crash: -5 points
  - Wrong size info: -1 point
  - Wrong disassembled Opcode: -2 points

EA: 25 points, till 0

- For each incorrectly disassembled EA mode
  - Causing program crashes: -5 points
  - Wrong disassembled EA mode: -2 points

Documentation: 10 points

No report: 0.

For each missing category of the following four, -2 points.

- Program description
- Specification
- Test Plan
- Team assignments and report
