68000 Assembler by Paul McKee: http://neo.dmcs.pl/pn/asembler_68000/asm.html

(http://neo.dmcs.pl/pn/asembler_68000/asm.html)

Test code example (a simple version): [test.X68](#)

(<https://canvas.uw.edu/courses/1408528/files/67695666/download?wrap=1>)

Main program example (see how to include subroutine files): [main.x68](#)

(<https://canvas.uw.edu/courses/1408528/files/67695533/download?wrap=1>), [strings.x68](#)

(<https://canvas.uw.edu/courses/1408528/files/67695527/download?wrap=1>)

Subroutine example: [subroutine.x68](#)

(<https://canvas.uw.edu/courses/1408528/files/67695597/download?wrap=1>)

Branch example: [Branch.X68](#)

(<https://canvas.uw.edu/courses/1408528/files/67695556/download?wrap=1>)

Memory test example: [memorytest.X68](#)

(<https://canvas.uw.edu/courses/1408528/files/67695594/download?wrap=1>)

Absolute addressing example: [AbsoluteAddressing.X68](#)

(<https://canvas.uw.edu/courses/1408528/files/67695598/download?wrap=1>)

Examples about "for loop" can be found from 68KInstructionSet.pdf
